## Appendices

Appendix 1 – Comparative housing requirements.....	13
Appendix 2 – Excluded or unsuitable sites.....	14
Appendix 3 – Detailed site specific assessments, is provided in a separate document to this report.	

## Clarification

For the avoidance of doubt the council makes the following clarification with regard to the Wiltshire Strategic Housing Land Availability (SHLAA):

- The inclusion of sites within the deliverable or developable supply of this study should not be taken to imply that the council would automatically consider planning applications favourably. Conversely, the exclusion of a site from this supply does not mean that it could not come forward, providing that the constraints identified could be satisfactorily overcome.
- Although the assessment will inform housing allocations, it will not in itself determine the allocation of land for housing development. It will also not prejudice the use of land for purposes other than residential development. All future planning applications will be considered individually, taking other material considerations into account, and will be assessed through policies in the most up to date development plan.
- The estimated timescale for the delivery of a site, does not mean that a site could not come forward sooner, providing that any constraints were managed. Similarly, it does not mean that the site could not be delivered later in the plan period.
- This assessment seeks to identify the potential delivery of new housing sites. It must be recognised that this differs from a realistic trajectory in that it identifies the potential supply.
- The boundaries of sites identified in the assessment do not preclude any extensions to these sites.
- The densities in the SHLAA are intended to provide a tool for comparison and may not reflect the final density of specific sites.
- Judgements concerning whether sites should be allocated in future Local Development Documents (LDDs) will be made through the statutory planning process which will further test the sustainability of any site identified in this assessment. This will include Strategic Environmental Assessment (SEA) and Sustainability Appraisals (SA).
- The information that accompanies the SHLAA is based on information available at the time of the study.

## 1.0 Introduction

- 1.1 The Wiltshire Strategic Housing Land Availability Assessment (SHLAA) is a comprehensive study of sites within the County which have the potential to accommodate new housing development.
- 1.2 PPS3 sets out the requirement for Local Authorities to demonstrate a five year deliverable and 6-10 year developable supply of housing. Local Authorities are required to demonstrate that they have a sufficient supply of potential sites suitable for residential development to meet the annual housing requirements locally. The SHLAA aims to ensure that there is sufficient land available to meet the housing needs of our communities both now and in the future.
- 1.3 PPS3 notes how Local Development Document policies should be informed by a robust, shared evidence base of land availability through a SHLAA which should also be the primary mechanism through which to identify a deliverable and developable supply of sites.
- 1.4 The following report summarises the results of the assessment in accordance with the Wiltshire SHLAA methodology<sup>1</sup> and demonstrates the council's current housing supply situation.

### Aims and Objectives

- 1.5 The main aim of the SHLAA is to identify a deliverable and developable supply of land for housing. This will demonstrate whether the council is in a position to meet the housing requirement and will form a key part of the evidence base of the Local Development Framework (LDF).
- 1.6 The key objectives of the SHLAA, identified in national guidance<sup>2</sup> are to:
  - Assess land availability by identifying buildings or areas of land (including previously developed land and greenfield) that have development potential for housing.
  - Assess the potential level of housing that can be provided on identified land.
  - Identify constraints that might make a particular site unavailable and/or unviable for development.
  - Assess which sites are likely to be deliverable and which are likely to be developable.
- 1.7 The results from this SHLAA will be used to inform the LDF allocation process, although the identification of sites in this report will not automatically determine allocations for housing development.

### Core requirements/outputs

- 1.8 Practice Guidance (para 14) states that as a minimum, the Assessment should provide certain core Outputs and follow minimum process requirements to ensure that it is robust and credible in order to meet the tests of soundness as set out in PPS12.

---

<sup>1</sup> <http://www.wiltshire.gov.uk/planning-shlaa-sep2011-methodology.pdf>

<sup>2</sup> Strategic Housing Land Availability Assessments: Practice Guidance, Communities and Local Government, 2007

- 1.9 The assessment will therefore provide:
- A list of sites, cross-referenced to maps showing locations and boundaries of specific sites and broad locations (where necessary).
  - An assessment of the deliverability and developability of each identified site, in terms of suitability, availability and achievability (PPS3 para 54) to determine when a site is realistically expected to be developed.
  - The potential quantity of housing that could be delivered on each identified site or within each identified broad location (where necessary) or on windfall sites (where justified).
  - The constraints on the delivery of identified sites.
  - Recommendations on how these constraints can be overcome and by when.

#### Housing market areas in Wiltshire

- 1.10 The guidance states that ‘Assessments should preferably be carried out at the sub-regional level, for separate housing market areas’. Housing Market Areas were defined by DTZ in 2004, and have been approximated to conform to local authority boundaries. Since then, Wiltshire has undergone Local Government reorganisation, and the previous district and county authorities have ceased to exist, being replaced by a single unitary authority.
- 1.11 This means that in the case of Wiltshire, the HMAs no longer coincide with local authority boundaries. DTZ defined three HMAs that coincide with Wiltshire as displayed in Figure 1.

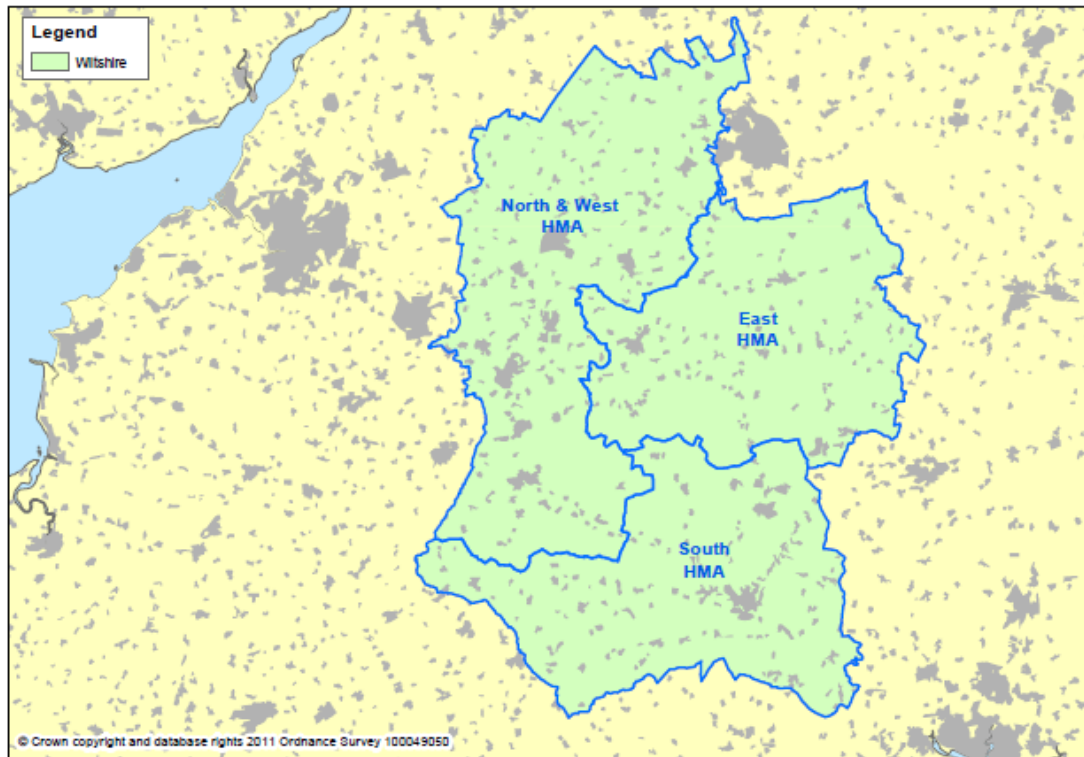

**Figure 1: DTZ housing market areas in Wiltshire**

- 1.12 Since the work by DTZ, Wiltshire Council has commissioned a Strategic Housing Market Assessment which defines revised Housing Market Areas based on the

Community Areas within Wiltshire. The results of this SHLAA will be made available at this level. These HMAs are presented in Figure 2.

**Figure 2: Revised housing market areas**

- 1.13 This SHLAA is the first that covers the whole of Wiltshire. It replaces the previous SHLAAs for the component areas. It has been decided to revise the previous methodologies in the light of further best practice guidance<sup>3</sup> in order that the council is able to monitor potential delivery in-house, to produce an assessment that is consistent with the assessments produced by those authorities in the HMAs that cover Wiltshire but lie outside of Wiltshire, as well as facilitating dialogue between the council and potential developers.

#### Time period of the SHLAA

- 1.14 This assessment reflects the situation as of 31<sup>st</sup> March 2011, and will be updated annually. All potential sites that were identified prior to 19<sup>th</sup> August 2011 are included in this assessment.

<sup>3</sup> (Land Supply Assessment Checks, Communities and Local Government, 2009)

## 2.0 Policy context

### National policy

- 2.1 PPS 3 highlights the Government's objective for everybody to have access to a decent home. It notes how there is a need to provide a greater choice in housing to ensure that the needs of all in the community are met. In order to achieve this, the Government has emphasised the importance of a "flexible, responsive supply of land which is managed in a way that makes efficient and effective use of land, including the re-use of previously-developed land, where appropriate"
- 2.2 The Strategic Housing Land Availability Assessments Practice Guidance (hereafter referred to as the Guidance) details the requirement for local planning authorities to:
- Identify specific, deliverable sites for the first five years of a plan that are ready for development.
  - Identify specific, developable sites for years 6–10 and ideally years 11–15.
  - Where it is not possible to identify specific sites for years 11–15 of the plan, indicate broad locations for future growth.
  - Not include an allowance for windfalls in the first 10 years of the plan unless there are justifiable local circumstances that prevent specific sites being identified.
- 2.3 According to the Guidance, to be considered to be deliverable, developable or not currently developable a site must meet the following criteria:
- Deliverable – a site should be available now, offer a suitable location for housing development and there should be a reasonable prospect that housing will be delivered on the site within five years from the date of adoption of the plan.
  - Developable – a site should be in a suitable location for housing development, and there should be a reasonable prospect that it will be available for and could be developed at a specific point in time.
  - Not currently developable – where it is unknown when the site could be developed because constraints are so severe it is not known when they may be overcome.

### Housing requirement

- 2.4 The adopted development plan that sets out the housing requirement for Wiltshire consists of the Wiltshire and Swindon Structure Plan 2016 and the four Local Plans.
- 2.5 These were due to be superseded by the emerging Regional Spatial Strategy. However, this strategy did not reach adoption in the South West. Furthermore, on the 27 May 2010 the Secretary of State for Communities and Local Government announced the intention to "rapidly abolish regional strategies (RS)". The intention to revoke regional strategies will mean that "local planning authorities will be responsible for establishing the right level of local housing provision in their area, and identifying a long term supply of housing land without the burden of regional targets".
- 2.6 On this basis work has been undertaken to establish Wiltshire's long-term strategic housing requirement through a comprehensive review as part of the

development plan process and has been tested through consultation. These housing requirements have been identified within the context of the localism agenda and in anticipation of the publication of the Decentralisation and Localism Bill. With this in mind, the emerging housing requirements are used within this assessment to assess the housing land supply. Comparative figures for the other plans can be made readily available and will be summarised within Appendix 1.

**Figure 3: Net requirement figures**

Area	Wiltshire Core Strategy	
	Total no. of dwellings 2006-2026	Average no. of dwellings per year
East HMA	5,500	275
North and West HMA	21,600	1,080
South HMA	9,900	495
<b>Wiltshire</b>	<b>37,000</b>	<b>1,850</b>

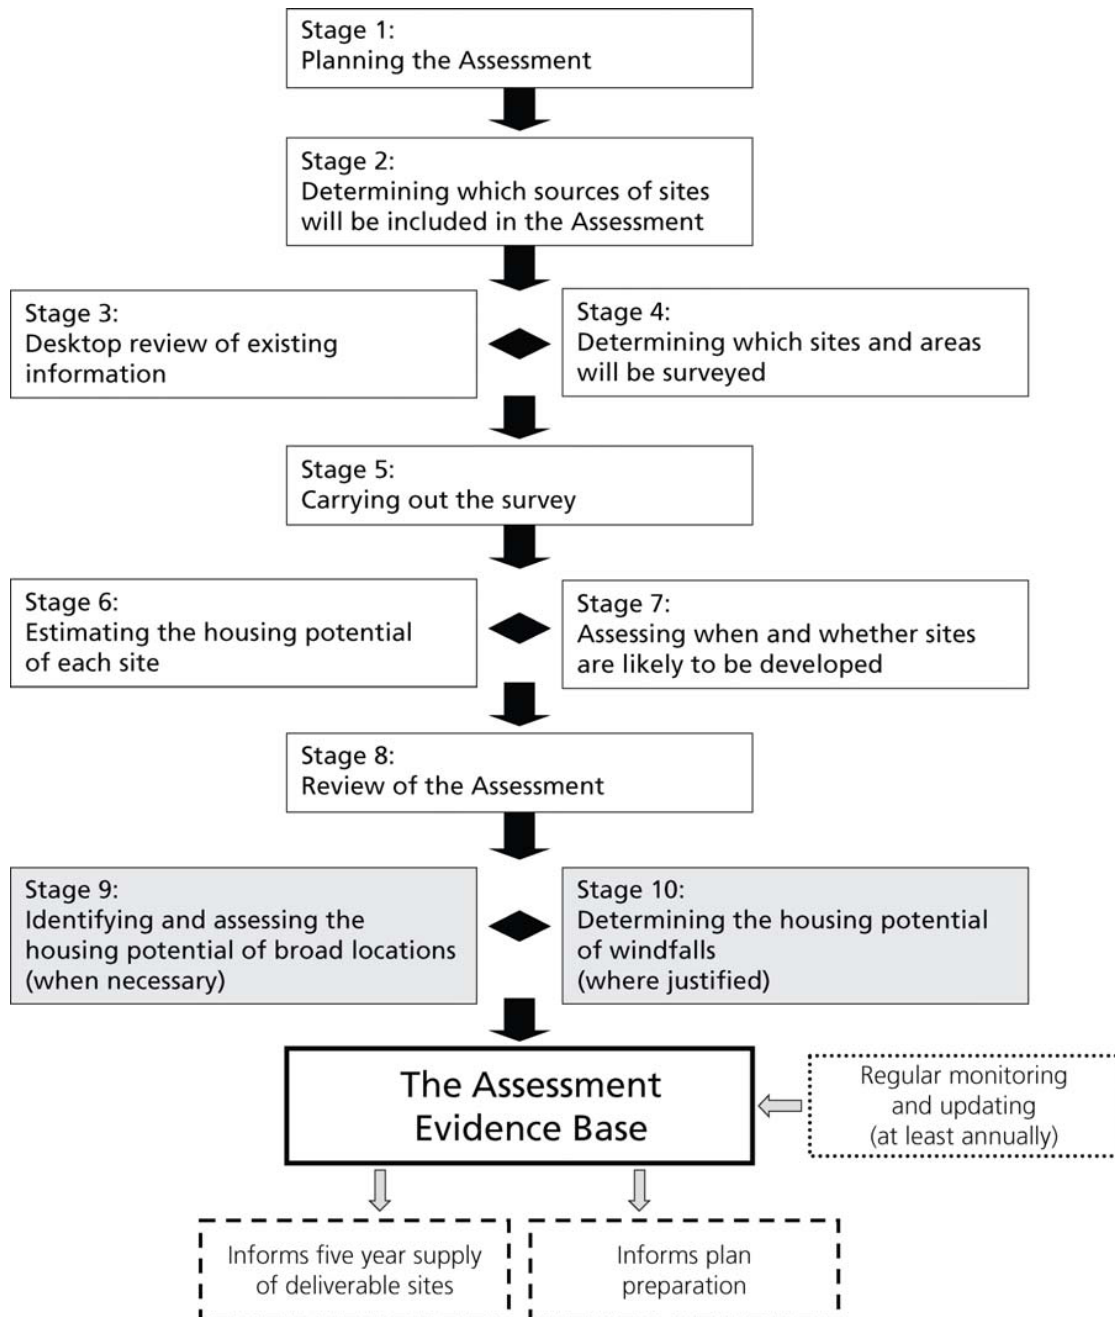

#### Local context

- 2.7 The Strategic Housing Land Availability Assessment forms an essential part of the evidence base for local authorities and should be updated on an annual basis. The SHLAA is designed to estimate the potential capacity on all identified sites and to assess whether there is a sufficient supply to meet the requirements set out in the appropriate development plan.
- 2.8 The sites identified in the previous SHLAA were used to identify the strategic site options in the Wiltshire 2026 consultation (October to December 2009). These options were developed using both information in the SHLAA and a host of other site specific information gathered through further engagement with landowners, developers and council officers.
- 2.9 The options were reviewed following the results of the consultation, and additional information gathered to inform the deliverability of these sites. All the information gathered through these exercises has been considered in this assessment.
- 2.10 The options were then refined and presented within the Wiltshire Core Strategy consultation draft (June to August 2011).
- 2.11 The South Wiltshire Core Strategy, which has been progressed in advance of the Wiltshire Core Strategy, went to examination in public in August 2011. It is currently undergoing a fact checking exercise prior to the Inspector's binding report.
- 2.12 The Wiltshire Core Strategy is progressing towards a pre-submission consultation, in early 2012. The responses from the Wiltshire Core Strategy consultation (June to August 2011) are currently being processed and any necessary revisions made.

### 3.0 Methodology

3.1 Figure 4 outlines the key stages involved in a Strategic Housing Land Availability Assessment. This process is detailed in the SHLAA Guidance and constitutes the methodology used in the production of this SHLAA.

**Figure 4: Strategic Housing Land Availability Assessment Process**

The Wiltshire SHLAA methodology

3.2 The assessment has been undertaken in line with the Wiltshire SHLAA methodology<sup>4</sup>. This methodology is consistent with that required by the SHLAA Practice Guidance.

<sup>4</sup> <http://www.wiltshire.gov.uk/planning-shlaa-sep2011-methodology.pdf>.

- 3.3 In order to ensure that the assessment is accurate, the base information used within the assessment was made available to site representatives during September 2011. At this time, spatial planning officers also reviewed the draft assessments, in order to identify misinformation or information gaps. All comments were considered and appropriate adjustments were made, before presenting the assessment to the Housing Market Partnership.
- 3.4 It is proposed that site representatives will be contacted on an annual basis to assess the continuing delivery aspirations of each suitable site. Information from ongoing engagement between LDF officers and developers, landowners and agents, will also be used to review the housing land supply.

#### **4.0 Results of the assessment**

- 4.1 The assessment has been undertaken separately for committed and proposed sites, and for uncommitted sites.
- 4.2 Committed and proposed sites include:
- Sites subject to an extant planning permission (including those subject to a S106 agreement): for which site representatives have been contacted to provide the expected delivery timetable. Where no response was received, developer's websites and information held by Wiltshire Council officers has been used to estimate a realistic delivery timetable. The results of this work can be found in Appendix 8.2 of the 2010/11 Wiltshire Annual Monitoring Report (due to be published January 2012).
  - Sites subject to an extant Local Plan allocation: for which site representatives have been contacted to establish the prospects and timetable for delivery at each site. Those that have no prospect of delivery will not be saved within the Wiltshire Core Strategy. The results of this work can be found in Appendix 8.2 of the 2010/11 Wiltshire Annual Monitoring Report (due to be published January 2012).
  - Sites that are currently being considered to be included as strategic site allocations within the emerging Wiltshire Core Strategy<sup>5</sup>: a great deal of evidence has been gathered and examined for these sites, and the site representatives have been consulted extensively to provide the expected delivery timetable. The results of this work can be found in Appendix 8.2 of the 2010/11 Wiltshire Annual Monitoring Report (due to be published January 2012). Furthermore, detailed delivery templates for each site, containing a summary of the information gathered will be made available alongside the pre-submission consultation.
  - Sites included in the Chippenham Vision: detailed information was provided for these sites and delivery timetables were estimated. Similar Vision exercises exist for both Trowbridge and Salisbury, but there was not sufficient evidence to detail the likely delivery timetables of sites in these exercises. The sites are instead assessed alongside uncommitted sites, in the absence of this information. The results of this work can be found in Appendix 8.2 of the 2010/11 Wiltshire Annual Monitoring Report (due to be published January 2012).

---

<sup>5</sup> This includes a number of sites which were not included in the Wiltshire Core Strategy consultation document (June 2011), but which were identified through the consultation as fulfilling the strategic requirements of Wiltshire.

- 4.3 Uncommitted sites include:
- All other sites submitted as part of the continuing Call for Sites exercise (prior to August 19<sup>th</sup> 2011) or identified within the previous SHLAA or identified by the Council as having potential for development: these sites were assessed according to the SHLAA methodology as outlined within the SHLAA methodology report. The results of these assessments can be found in Appendix 3 to this document.

### **Suitability**

- 4.4 The suitability of each site has been assessed. All committed and proposed sites have been subject to a detailed site specific assessment through the development of the Wiltshire Core Strategy or as part of the application process and so are considered suitable. For the remaining sites, the suitability has been assessed according to the Wiltshire SHLAA methodology.
- 4.5 Of the 1,252 identified uncommitted sites, some 766 are considered suitable. All sites considered unsuitable or excluded for other reasons are listed in Appendix 2.

### **Availability**

- 4.6 The availability of all sites has been assessed. For committed and proposed sites, site representatives were contacted in order to provide detailed information. For the remaining sites, the availability has been assessed according to the Wiltshire SHLAA methodology.
- 4.7 Of the 766 uncommitted suitable sites, some 417 are considered immediately available.

### **Achievability**

- 4.8 The achievability of committed sites has been assessed through liaison with site representatives.
- 4.9 The viability of uncommitted sites has been undertaken by considering a broad sample of sites assessed according to a viability model that was developed in liaison with a sub-group of the Housing Market Partnership. This considers the viability of sites in various locations to identify the proportion of sites in each location that can be considered to be viable (excluding site abnormalities), subject to the affordable housing policy within the Wiltshire Core Strategy consultation draft (June to August 2011).
- 4.10 Using this methodology each site is not individually assessed, but rather the cumulative achievability is. Figure 5 displays the viability factor for each community area.

**Figure 5: Proportion of uncommitted supply considered achievable**

<b>Community Area</b>	<b>Viable proportion</b>
Amesbury	100%
Bradford on Avon	100%
Calne	96%
Chippenham	94% <sup>1</sup>
Corsham	100%
Devizes	92%
Malmesbury	100%
Marlborough	100%
Melksham	94%
Mere	100%
Pewsey	100%
Royal Wootton Bassett & Cricklade (inc West of Swindon)	99%
Salisbury	79% <sup>1</sup>
Southern Wiltshire	100%
Tidworth	88%
Tisbury	100%
Trowbridge	20%
Warminster	91%
Westbury	16%
Wilton	100%
<b>Wiltshire</b>	<b>87%</b>

### **Delivery timetable**

- 4.11 Only those sites that are considered suitable, available and achievable can be considered to be deliverable within five years. Those which are suitable but not currently available or achievable are considered to be developable within 6-10 years or in 10-15 years (depending on site specific information). Those that are not suitable or will not be available or achievable across the plan period are considered undevelopable.
- 4.12 In order to assess the delivery timetable of the committed sites, the site representatives have been contacted to provide detailed delivery trajectories. For uncommitted sites, an estimate has been undertaken using site specific information received from site representatives, and the above assessment. For those sites where developers (where known) will not have the capacity to deliver multiple sites at a single time, this has also been considered.

### **Committed sites**

- 4.13 The identified delivery of the committed and proposed sites, undertaken in line with the above methodology, including site specific information being obtained from site representatives, is presented in Figure 6. This information is detailed within the five year land supply statement in the Annual Monitoring Report 2010-2011 (due to be published in January 2012).

### **Uncommitted sites**

- 4.14 The identified delivery for all uncommitted sites is also presented in Figure 6. This includes the achievable proportion of all available and suitable sites. The full assessment for each site is available within Appendix 3.

## **Identifying and assessing the housing potential of broad locations**

- 4.15 The guidance allows the identification of broad locations where there are not enough specific sites to demonstrate a supply for 11-15 years. However, this is clearly not the case for Wiltshire. Additional sites will need to be identified in some of the sub-areas of the county, but it is envisaged that these will come forward as small sites beyond the scope of this assessment.

## **Determining the housing potential of windfalls**

- 4.16 PPS3 defines windfalls as “those which have not been specifically identified as available in the local plan process. They comprise previously-developed sites that have unexpectedly become available...for example, large sites resulting from, for example, a factory closure or small sites such as a residential conversion or a new flat over a shop.”
- 4.17 Although the SHLAA Guidance notes the emphasis of specific, deliverable sites in PPS 3, it is also recognised that there may be local circumstances to justify the inclusion of an allowance for windfall site delivery, although this should only be considered for the period beyond 10 years. Such an allowance should be realistic, having regard to the SHLAA, historic windfall rates and expected future trends.
- 4.18 It is considered appropriate to at least comment on the delivery on windfall sites (unallocated previously developed land) in Wiltshire, as over the preceding two years these have accounted for 47% of total delivery. However, it should be noted that there is no need for a windfall allowance in Wiltshire as there are sufficient sites to meet the emerging housing requirement at a Housing Market Area level, and so this will not be quantified.

## **5.0 Conclusion**

- 5.1 It is evident that there are sufficient suitable, available and achievable sites in Wiltshire to meet the identified requirement at a Housing Market Area.

<sup>7</sup> Includes the parts of Trowbridge that lies within Bradford-on-Avon and Melksham CAs

## Appendix 1 – Comparative housing requirements

### Wiltshire and Swindon Structure Plan 2016

The Wiltshire and Swindon Structure Plan set out a requirement for between 34,000 and 35,000 dwellings in Wiltshire (depending upon the location of 1,000 dwellings to be built at the West of Swindon) from 1996 to 2016. This compares to the requirement for 37,000 dwellings in the emerging Core Strategy from 2006 to 2026.

### Secretary of State's proposed changes to the draft RSS

The emerging RSS set out a requirement for some 44,400 dwellings in Wiltshire from 2006 to 2026, some 3,000 of which would be developed to the West of Swindon to respond to the housing requirements of Swindon.

The distribution of these requirements is set out in the table below.

	Wiltshire and Swindon Structure Plan 2016	Secretary of State's proposed changes to the draft RSS
	1996-2016	2006-2026
East Wiltshire	5,250	6,000
North Wiltshire	9,000	13,700
Chippenham	3,000	5,500
West of Swindon	0-1,000	3,000
North Wiltshire remainder	6,000	5,200
South Wiltshire	8,000	12,400
Salisbury	3,900	6,000
South Wiltshire remainder	4,100	6,400
West Wiltshire	11,750	12,300
Trowbridge	5,000	6,000
West Wiltshire remainder	6,750	6,300

## Appendix 2 – Excluded or unsuitable sites
