

Written Statement for Issue 4 Consistency with National Policy

by the Wessex Regionalist Party

We are profoundly disappointed to read that the Inspector will disregard any further evidence critical of the County Council's policy of collaboration with the London regime in imposing unsustainable development on the area. The need to move away from ecocidal policies of economic growth and population expansion is now desperate.

The London regime and its servants must surely understand that obstructing the presentation of the truth is not a rational basis for policy-making. Over the long-term, it threatens the very survival of the communities of Wiltshire and of Wessex generally. We can only conclude that that is the intention.

Yours sincerely

David Robins

Secretary-General

Wessex Regionalist Party
