

What is proposed in your community area?

Types of facilities

Household recycling centre
Public facilities, where household waste can be taken for recycling

Materials recovery facility
Collecting, separating, sorting and bulking a wide range of waste materials prior to transfer

Waste transfer station
A depot where waste is deposited, stored, bulked and then transferred in larger loads to another facility for recycling, treatment or disposal

Local recycling
Collecting, storing and bulking particular waste materials prior to transfer (can also include metal recycling, car-depolution and Waste Electrical and Electronic Equipment (WEEE) facilities)

Inert waste recycling/transfer
Processing, screening, blending and crushing of inert wastes to produce quality recycled aggregates

Composting
Where farms or small waste management sites receive inputs (green and putrescible waste) from limited sources
