

This Landscape Character Assessment for the Cotswold Water Park has been principally based on the earlier assessments undertaken for Gloucestershire and Wiltshire counties, together with reference to the Oxfordshire Wildlife and Landscape Study in respect of the small areas within the study area that lie within Oxfordshire. Further detail was also provided by the North Wiltshire Landscape Character Assessment.

Both the Gloucestershire and Wiltshire studies involved wide consultation. Many aspects of the information gained from these earlier consultations have therefore been taken into account, and where appropriate, integrated into this current study. Reference should therefore be made to the wide ranging consultees in these earlier studies.

We wish to acknowledge the assistance of the Planning and GIS officers at Wiltshire County Council and Gloucestershire for their support in respect of the preparation of this study. In particular, Wiltshire County Council provided digital data for the baseline study, as well as technical guidance where required. The principal contacts were as follows:

Garry King	Principal Planner (Countryside), Wiltshire County Council
Ann Clark	GIS Officer, Wiltshire County Council
John England	Information & Systems Officer, Gloucestershire County Council
