APPENDIX 2 – SMALL SITES WITH PLANNING PERMISSION

Base date: April 2022

Published: May 2023

Housing Land Supply Statement

**APPENDIX 2 – SMALL SITES
WITH PLANNING PERMISSION**

Base Date: April 2022

Published: May 2023

Appendix 2: Small sites contributing to the deliverable supply

Small sites within the supply (except for Neighbourhood Plan allocations of less than 10 dwellings, which are included in Appendix 1) have been ordered by their Housing Market Area, then by either the main settlement in the Community Area or the rural remainder. The summary for each sub-area shows the total number of units still outstanding on the permission, the number of units under construction, and any completions or losses to date. The number of units assumed to be developable is based on historic delivery rates for small sites (rounded to the nearest whole unit.).

The 'Dwellings outstanding at April 2022' column represents the net dwelling units remaining to be developed on the permission. As such values of zero (e.g. an unimplemented replacement dwelling) and values less than zero (e.g. an unimplemented conversion of two dwellings into one unit) in this column are a valid assessment of the remaining development still to be implemented.
