

# Salisbury - Our place in the future

## Creating people-friendly streets

### CAF Project: Salisbury railway station

Transformational redevelopment of the Salisbury station forecourt to deliver a greatly enhanced arrival experience for visitors. The intention is to redesign the area away from being dominated by car parking (albeit sufficient car parking will be integral to the project), in favour of creating an improved experience for pedestrians using the area. The redevelopment will include a much improved bus interchange for tourists travelling onward to Stonehenge and direction finding into the city.
