

Appendix 2 Designated Local Green Spaces

Overview

The National Planning Policy Framework (NPPF), published by the Department for Communities and Local Government in July 2021, sets out the government's planning policies for England.

Paragraphs 101 to 103 introduce a Local Green Space (LGS) designation to protect local green areas of special importance to local communities.

This enables communities, in particular circumstances, to identify and protect areas that are of value to them through neighbourhood plans.

LGS is designated through Neighbourhood and Local Plans, and once it is in place, it is subject to the same strong development restrictions as Green Belt, ruling out new development except in special circumstances.

There are particular criteria which must be fulfilled in order for LGS designation to be possible:

- 1) The land has to be 'reasonably close to the community it serves'.**
- 2) The land has to be 'demonstrably special to a local community and hold a particular local significance'.**

Evidence must be provided of the land's value to and use by the local community to show that it holds a particular local significance. The following are examples:

a. **Beauty**

This relates to the visual attractiveness of the site, and its contribution to landscape, character and or setting of the settlement. The LGS would need to contribute to local identity, character of the area and a sense of place, and make an important contribution to the physical form and layout of the settlement. It may link up with other open spaces and allow views through or beyond the settlement which are valued locally.

b. **Historic significance**

The land should provide a setting for, and allow views of, heritage assets or other locally-valued landmarks. It may be necessary to research historic records from the County Archaeologist or National or Local Records Office.

c. **Recreational value**

It must have local significance for recreation, perhaps through the variety of activities it supports, and be of value to the community.

d. **Tranquility**

Some authorities have an existing tranquility map showing areas that provide an oasis of calm and a space for quiet reflection.

e. **Richness of wildlife**

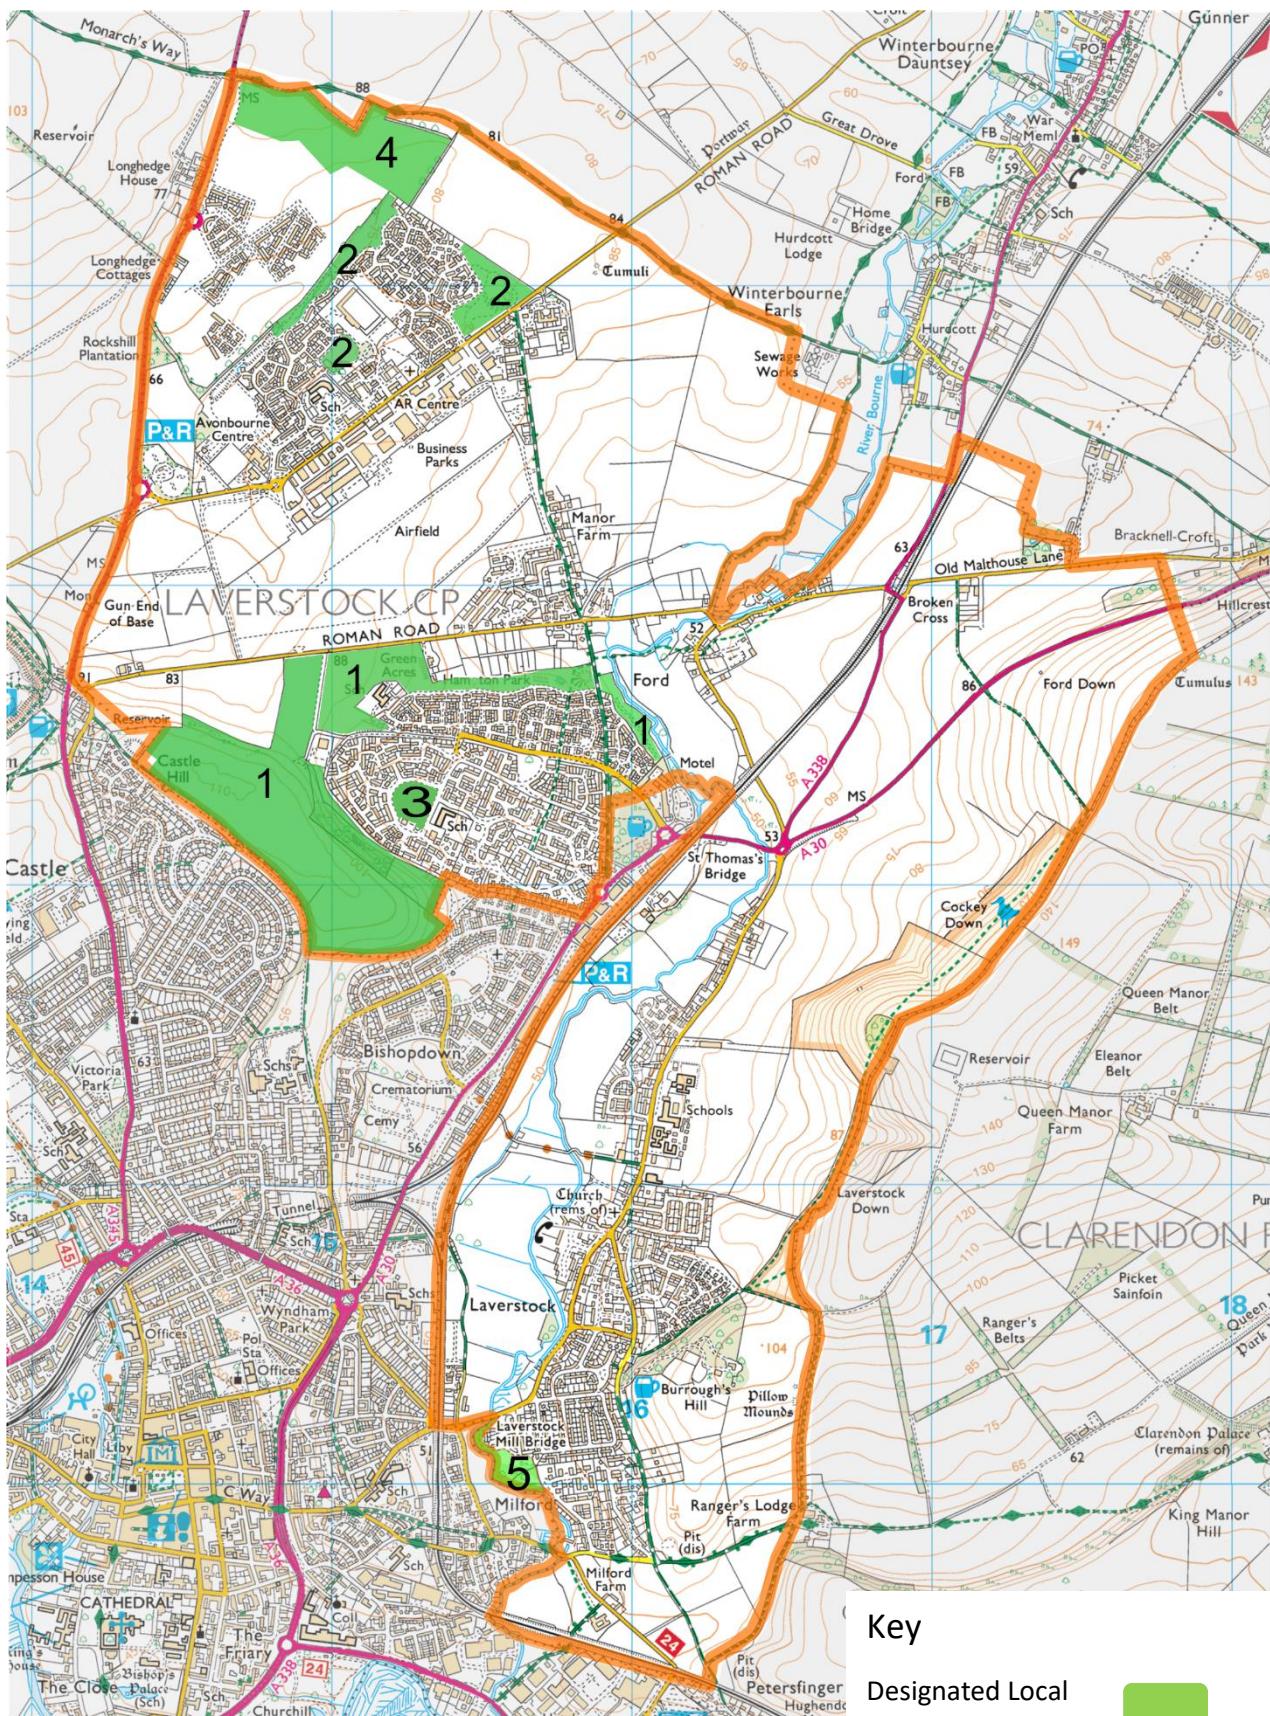

This might include the value of its habitat, and priority areas may have been identified by the council. It may require some objective evidence, such as a designation, like a wildlife site or Local Nature Reserve.

- 3) The land needs to be 'local in character, not an extensive tract of land'.**

The criteria may differ between settlements depending on their physical size and population. The areas would normally be fairly self-contained with clearly-defined edges.

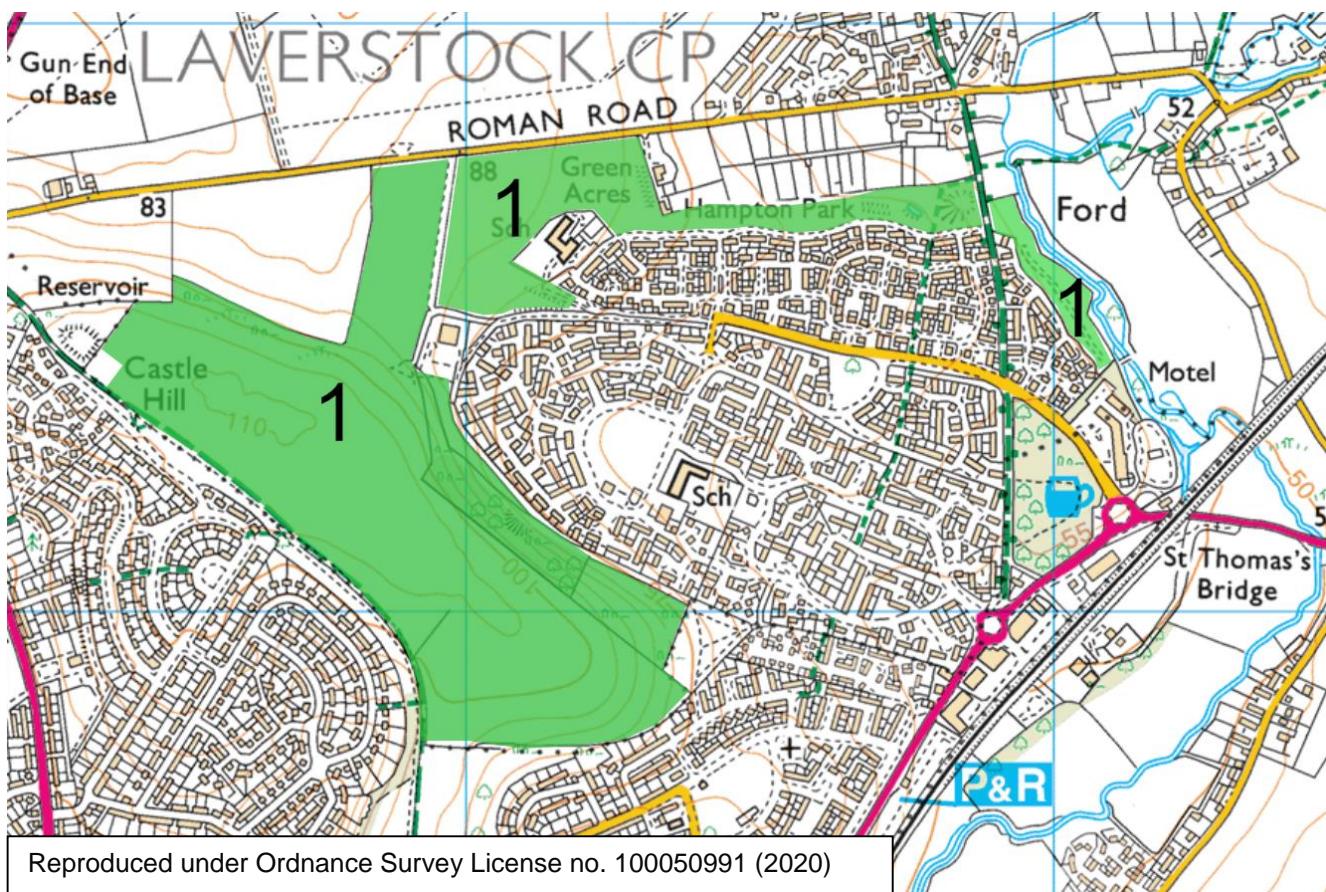

There are a number of green spaces with public and/or permissive access around the parish which the responses to the residents' questionnaire in 2019 showed are highly valued. The greatly increased use of the spaces by residents of both the parish and of the wider local area during the 2020/21 pandemic has underlined that finding. The locations of the areas which are believed to be appropriate to designate as Local Green Spaces are shown in green and are numbered 1 to 5 on the map in Figure 1 below. A description of how each meets the above criteria follows this in the corresponding numbered sections.

1 Castle Hill Country Park

The Park was given over to the Parish Council as part of the Riverdown Park housing development by BDW Homes. It extends to 55 hectares surrounding much of the Bishopdown Farm/Hampton Park/Riverdown Park community, with the Greentrees Primary School junior site adjacent to the middle number 1 in the map. It has numerous access points and links into the footpath network, so serves not only local residents but also those from the wider parish and Salisbury communities. Its upper reaches are traditional downland with a thriving population of skylarks, raptors and other bird species and a wide variety of wild flowers. Other parts have been planted with native trees and hedgerows and there are two community orchards with traditional local varieties of fruit trees. Stock fencing is in place in some areas to permit occasional grazing. A management plan is in place to maintain these and other aspects of the park.

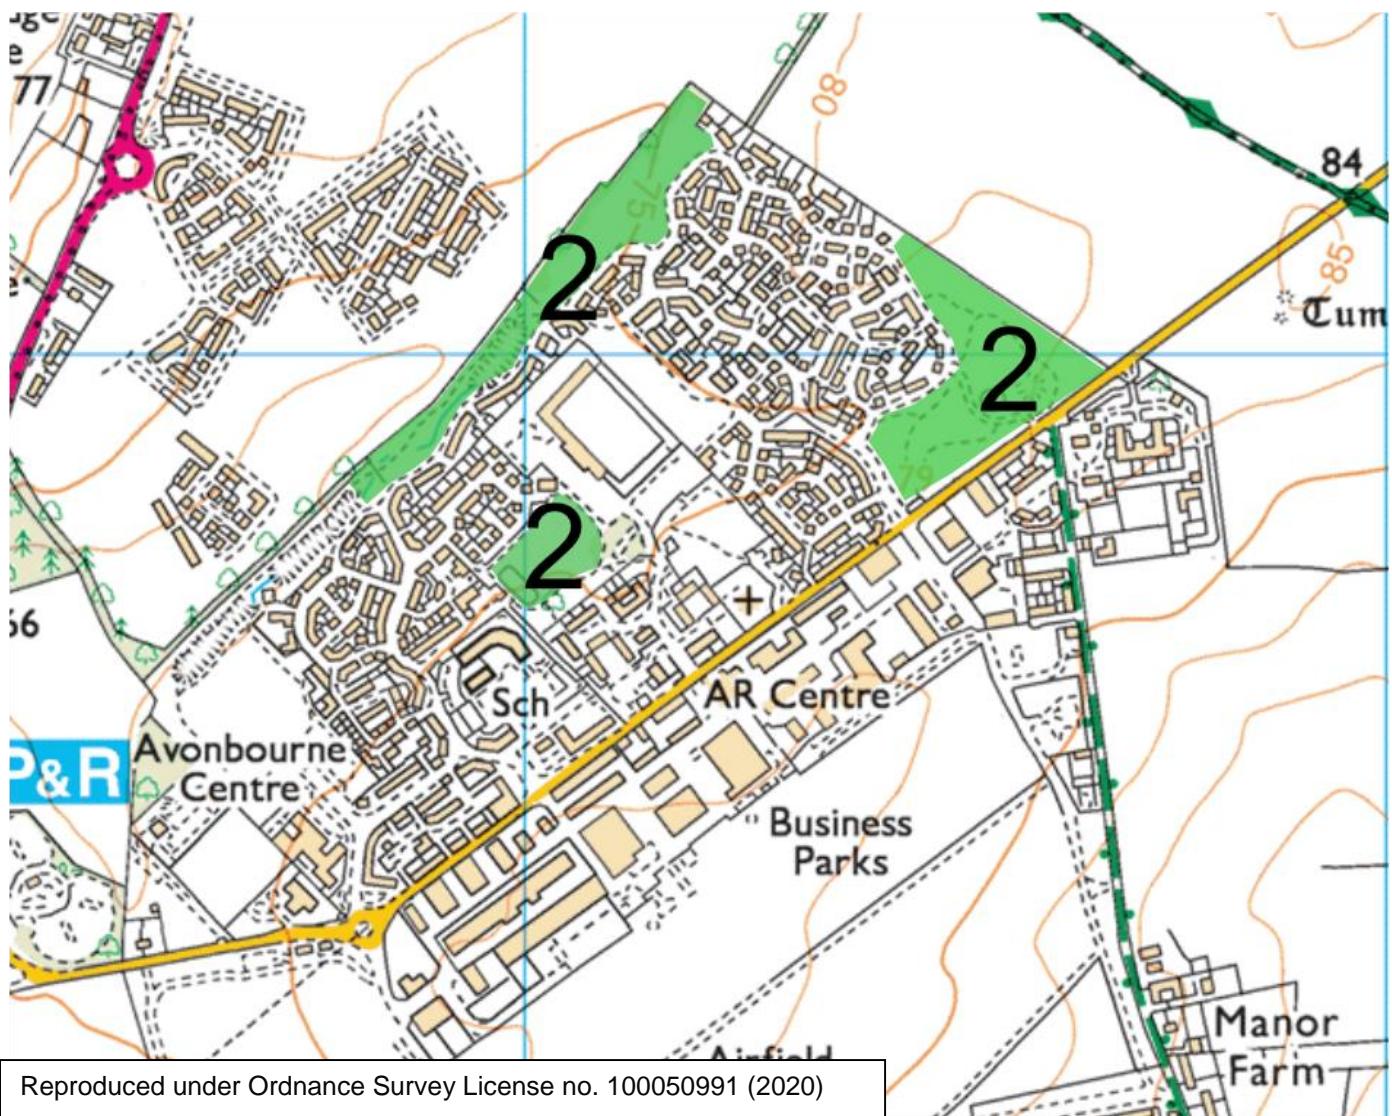

Recreational facilities include an extensive network of permissive paths, many of which are Hoggin surfaced with restricted gradients for accessibility. These paths afford views in many directions over the neighbouring downs to the east, Salisbury Plain to the north, Old Sarum Castle to the west and Salisbury Cathedral to the south. There are also several play parks, a multi-use games area, a furnished picnic area, a trim trail, an extensive mountain bike trail and an enclosed dog exercise area, thereby catering for most ages and interests. An iron-age themed group of earthworks provides a further play space for youngsters, celebrating the long history and rich archaeology of the area.

In the residents survey undertaken in 2019 91% agreed that the community owned open spaces, such as Castle Hill Country Park should be legally protected from future development, with no one disagreeing. 55% of parish residents and 89% of the local residents indicated that they use the park (and this was before the surfaced path network was in place). The residents' survey showed that the Country Park was highly valued by local residents as an amenity. Furthermore, the Park is used extensively throughout the day by both residents of the parish and visitors from other parishes. It has an accessibility infrastructure which for example makes it wheelchair and disability scooter compatible. The Park is not just an amenity

Referendum Version

with natural green areas and wild life and but also provides recreational facilities such as the outdoor gymnasium and a picnic area. In addition, it contains a very popular dog play/training area.

2 Old Sarum Green Spaces

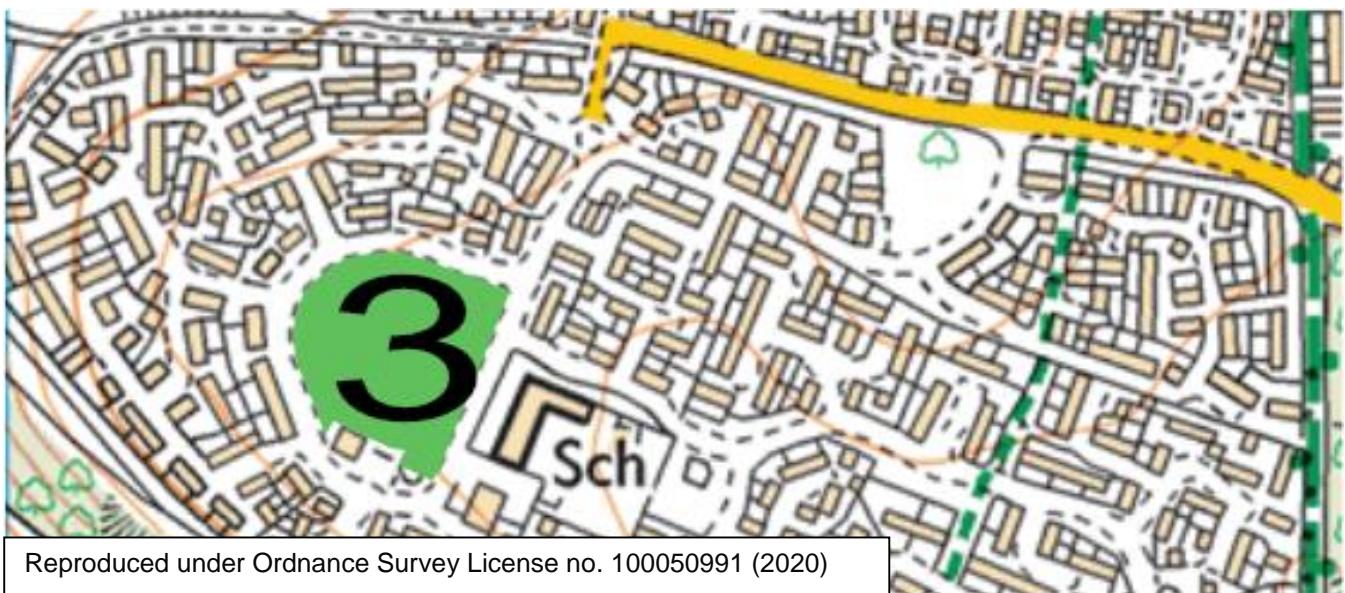

These green spaces were given over to the council by Persimmon as part of the Old Sarum mixed development. They comprise:

- a strip of Sustainable Urban Drainage ponds to the north west, which is largely mown grass, fringed by an old established hedge and along which are grass footpaths. The area connects with Longhedge green space (see section 5) at its northeast corner, providing an extensive area for walking and jogging.
- a grass recreation area, including a large play area, in the centre of the estate which is adjacent to the primary school and the community centre.
- a grass, tree and hedgerow area, including another play area, in the north east corner, known as Old Sarum country park. This has views out into open country to the north and is crossed by a tarmac and several Hoggin paths, which are very popular for younger children riding bikes.

In the residents survey 91% agreed that the community owned open spaces, such as these areas should be legally protected from future development, with no one disagreeing. 66% of parish residents and 92% of the local residents indicated that they use the areas.

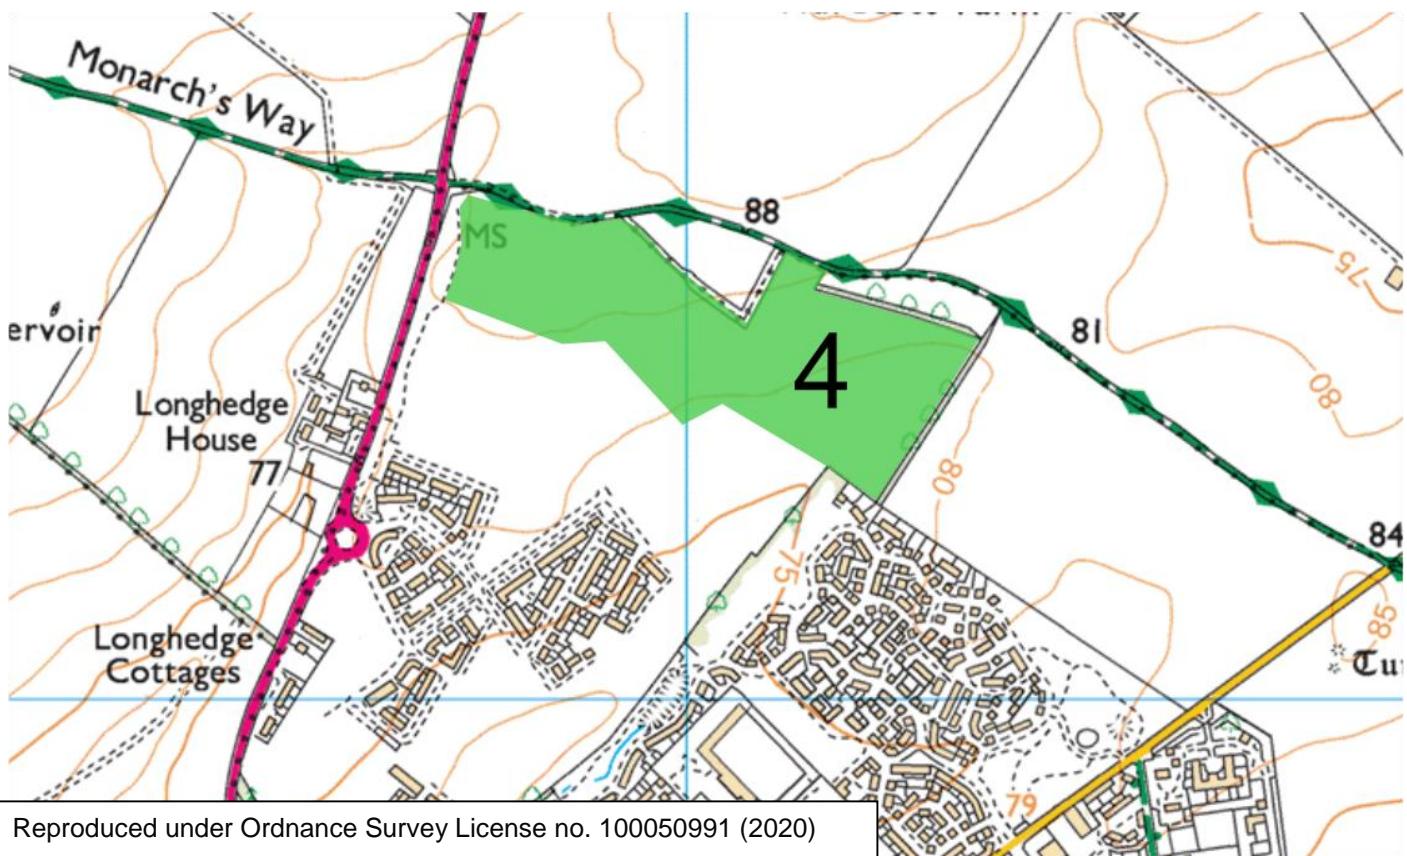

3 Hampton Park Green

This green space was given over to Wiltshire Council during the development of Bishopdown Farm and Hampton Park, which surround it. It provides a large mown area of grass, surrounded by maturing trees, which is used for a variety of recreational activities, and includes a substantial play area. Fronting onto the green is a pavilion providing a focal point for community activities, including a toddler group. Also adjacent is the infant site of Greentrees Primary School.

In the residents survey 91% agreed that the community owned open spaces, such as these areas should be legally protected from future development, with no one disagreeing. 88% of the local residents indicated that they value this area.

4 Longhedge Green Space

This area is in the process of being given over to Parish Council ownership as part of the Longhedge Village mixed development, which is still in progress. In spite of this, local residents, from both Longhedge and Old Sarum have been using the area for a while for walking and jogging, and for gaining access to the Monarch's Way long distance path which runs along part of its northern boundary. When established, it will have a network of paths and will provide a valuable wildlife habitat, having established hedgerows to the north and east and a large SUDS pond in the south east. It provides views into open country to the north and to Old Sarum Castle to the south. It also connects to the Old Sarum green space as explained in section 2.

In the residents survey 91% agreed that the community owned open spaces, such as these areas should be legally protected from future development, with no one disagreeing. 84% of the local residents (Old Sarum and Longhedge) indicated that they value this area.

5 Whitebridge Spinney, Laverstock

Reproduced under Ordnance Survey License no. 100050991 (2020)

Recreation area with children's play park adjoining the woodland in Whitebridge Spinney

This area is in the ownership of the parish council and consists of:

- a strip of mature woodland running south from Laverstock Road, adjacent to the River Bourne and containing a boardwalk
- an adjoining open grassy recreation area in the centre: this is the only public grassed space in Laverstock suitable for children to play and contains an equipped playpark.

In the residents survey 91% agreed that the community owned open spaces, such as these areas should be legally protected from future development, with no one disagreeing. 93% of the local residents (Laverstock and Milford) indicated that they value this area.
