Success stories!

I had been excluded, was not living at home and had no qualifications or work experience. The EEA worked hard to give me advice, update my CV and help me apply for jobs.

I am now working as a labourer and have since referred my brother to this service because it helped me so much.

My EEA talked to me about the option of a Traineeship and helped to establish that my employer could recruit me on this programme.

They supported both myself and the employer to make this happen, I am now focused on this path.

Due to poor mental health due to the lockdowns, my mood was low, and I wasn't engaging, but over time I developed a good relationship with my EEA.

They never gave up and I started a Foundation Course at College, the constant encouragement and focus the EEA gave me the motivation to start, I am very appreciative of the EET service.
